No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1985 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

INFORMATION FOR AUTHORS

The *Journal of Experimental Social Psychology* is devoted to the publication of research and theory on social interaction and related phenomena, including social motivation, social cognition, attitude and belief processes, and intergroup and intragroup processes. The *Journal* does not undertake to specify rigidly an appropriate domain of content, but seeks to reflect current significant research and theory relevant to the interests of experimental social psychologists. It is anticipated that most manuscripts accepted will report results of experimental, conceptually based research that advances specific social psychological theorizing. However, other types of papers, such as theoretical analyses, literature reviews, and methodological notes, are also encouraged to the extent that these papers contribute significantly to an understanding of social phenomena. It is expected that all empirical research submitted for consideration will have been conducted in a manner consistent with the American Psychological Association's *Ethical Principles in the Conduct of Research with Human Participants* (1973).

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Experimental Social Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright of the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Contributions and correspondence concerning editorial matters should be sent to the Editor, **Dr. Thomas M. Ostrom, Department of Psychology, Ohio State University, 404C 17th Avenue, Columbus, Ohio 43210.**

Form of manuscript. Manuscripts must be typewritten, double-spaced on one side of 8.5 × 11 inch white paper. Typescript is preferred, but copies reproduced by multilith or Xerox are acceptable if they are clearly legible and neat. All pages must be numbered. Four copies must be submitted, each copy including all figures and tables. *Page 1* should contain the title of the article, author(s) name(s) (without degrees), affiliation(s), a running title (abbreviated form of title) not exceeding 35 letters and spaces, and the complete mailing address of the person to whom correspondence should be sent. *Page 2* should contain an abstract of 100–200 words, conforming to the style of *Psychological Abstracts*.

Format and style must conform to the conventions and rules given in the 1983 *Publication Manual of the American Psychological Association,* third edition. The organization of the paper should be clearly indicated by appropriate headings and subheadings.

Footnotes should be kept to a minimum. If necessary, they should be designated by superscript Arabic numerals in the text and typed double-spaced on a separate page.

Figures. All graphs, drawings, and illustrations are considered as figures, and must be submitted in finished form ready for reproduction. Illustrations in color can be accepted

only if the authors defray the cost. Figures must be numbered consecutively with Arabic numerals in order of mention in the text. All figures must have descriptive legends typed double-spaced on a separate page at the end of the article.

Tables should be numbered consecutively with Arabic numerals in order of mention in the text and typed double-spaced on separate pages. Each table must have a descriptive heading typed double-spaced over the table. Footnotes to tables should be identified by superscript lower case letters and typed below the table. Figures and tables should be planned to fit the proportions of the printed page. Lettering on artwork for which engravings will be made should be large enough to be legible after a reduction of 50–60%.

References should be cited in text by author's name and publication date, e.g., Roe (1983). Literature citations should be arranged alphabetically and typed double-spaced at the end of the article. Journal titles should be written out in full. Please note the following examples.

Karpf, F. B. (1932). *American social psychology: Its origins, development, and European background*. New York: McGraw–Hill.

Upshaw, H. S. (1969). The personal reference scale: An approach to social judgment. In L. Berkowitz (Ed.), *Advances in experimental social psychology* (Vol. 4, pp. 315–371). New York: Academic Press.

Thibaut, J., & Faucheux, C. (1965). The development of contractual norms in a bargaining situation under two types of stress. *Journal of Experimental Social Psychology*, **1**, 89–102.

Proofs. Galley proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints will be provided free of charge. Additional reprints may be purchased; an order form will be included with the proofs.
